

AMAN SINGH

Full Stack & Frontend Developer | Game & Motion Graphics Designer

 Delhi, India  aman.singh@email.com  github.com/Amansingh1231

 linkedin.com/in/aman-singh7494

PROFESSIONAL SUMMARY

Creative Developer and Motion Designer with a strong background in **BCA (Gaming & Graphics)** and currently pursuing training in **Full Stack Web Development, Graphic Design, and Motion Graphics at Dice Academy**. Experienced in building responsive web applications, developing 3D/FPS gameplay mechanics, implementing computer vision models, and creating visual assets using **Adobe After Effects, Premiere Pro, Photoshop, and Figma**.

TECHNICAL & DESIGN SKILLS

 **Frontend & Full Stack**
HTML5, CSS3, JavaScript (ES6+), Node.js, Express.js, REST APIs, C#, Python

 **Graphic & Motion Design**
Adobe Photoshop, After Effects, Premiere Pro, Figma, UI/UX Design, Motion Graphics

 **Game Development & 3D**
Unreal Engine, Unity, Blender, 3D Asset Creation, FPS & Open-World Systems

 **Tools & Libraries**
Git, GitHub, VS Code, OpenCV, Convolutional Neural Networks (CNNs)

PROJECTS

Interactive Web Applications & Responsive Portfolios

HTML5 | CSS3 | JavaScript | Figma

- Designed and developed responsive, mobile-first web pages emphasizing clean component structure and seamless user navigation.
- Converted Figma wireframes and UI mockups into high-fidelity, interactive front-end web components.
- Implemented dynamic DOM manipulation, smooth styling transitions, and optimized layout assets for speed and performance.

Real-Time Sign Language Recognition System

Python | OpenCV | CNNs | Computer Vision

- Engineered a real-time gesture recognition pipeline utilizing computer vision algorithms to process and classify live video frames.
- Trained Convolutional Neural Network (CNN) models for accurate gesture classification and sign-to-text translation.
- Integrated the vision pipeline with a responsive frontend interface to display instant feedback and gesture outputs.

Project Sentinel

Unreal Engine | C++ | 3D Engine Architecture

- Developed tactical FPS gameplay mechanics, state-driven AI behaviors, and custom weapon hit-scan / projectile systems.
- Engineered responsive player controllers, camera collision handling, and inventory management logic.
- Optimized 3D asset performance and custom lighting setups for high-frame-rate gameplay.

Lost Frontier

Unreal Engine / Unity | C# / C++

- Engineered open-world survival mechanics including player traversal, resource gathering, and quest-driven progression.
- Designed custom 3D environment models, HUD elements, and motion-graphic UI overlays for immersive user feedback.

EDUCATION & TRAINING

Dice Academy

Sept 2026 – Present (In Progress)

Full Stack & Frontend Web Development, Graphic & Motion Graphics Design

Presidency University, Bangalore

2022 – 2025

BCA – Gaming & Graphics

G. Rio School, Kohima, Nagaland

Completed 2022

Higher Secondary Education (Class 12)
